### Roofing (material & labour)

<b>1. Asphalt Shingles - felt base</b>	\$1.50 - 1.75 sq.ft.
--	----------------------

#### 2. Roofing Labour only

another rule of thumb is using the pitch number and multiplying it by the number of bundles to come up with the cost of labour plus 10 % - no removal of existing material. i.e. pitch \* bundles = labour (+ 10 %)

## Flashing

It is advisable to replace all roof flashing at the time a new roof is installed. Counter flashing may be installed at any time over existing step or chimney flashing and can be colour coordinated to a homes exterior.
